Professional Summary

Senior Software Engineer with 10+ years of experience building enterprise software in financial services and e-commerce, specializing in Java/Spring Boot microservices and Python. Technical leader on a high-volume home-loan platform, with end-to-end delivery across architecture, AWS infrastructure as code, and production performance tuning. Daily practitioner of agentic, AI-assisted development.

Technical Skills

Languages, Frameworks & Data: Java, Spring Boot, Python, FastAPI, TypeScript, C#/.NET, SQL, Cassandra, JMS

AWS & IaC: ECS/Fargate, Lambda, Step Functions, Aurora PostgreSQL, DynamoDB, S3, MSK (Kafka), Amazon MQ, ALB, Route 53, IAM, Terraform

CI/CD & Observability: Jenkins, Spinnaker, Docker, Kubernetes, Liquibase, CloudWatch, Dynatrace, Splunk

Practices: Agile (Scrum, Kanban), microservices, REST APIs, blue-green deployments, multi-region failover, AI-assisted development (LLM agents)

Professional Experience

Senior Software Engineer — JPMorgan Chase, Wilmington, DE · Jun 2022 – Present

- Solo-built and deployed an enterprise mortgage income-calculation application (Python/FastAPI, TypeScript, Aurora PostgreSQL) in 10 sprints (~4 months) using agentic AI development, replacing an Excel-based process for several hundred daily underwriters
- Provisioned the full AWS infrastructure with Terraform (ECS/Fargate, Lambda, Step Functions, ALB, Route 53), including multi-region failover, blue-green deployments, and ADFS single sign-on
- Cut a high-volume transaction from ~2s to ~25ms (~80x) by replacing developer-added delay jitter with an atomic database operation, fixing a race condition and draining a 10,000-message backlog
- Built a reusable, polymorphic S3-integration platform adopted by multiple teams
- Use agentic AI workflows daily (spec-driven development with orchestrated sub-agents) to accelerate delivery of production Java and Python code
- Technical leader on a home-loan team: develop and operate Java/Spring Boot microservices (REST, JMS) handling thousands of daily transactions (up to ~10,000 on peak days) via Jenkins, Spinnaker, and AWS

Software Engineer (promoted Oct 2019) — Qurate Retail Group, West Chester, PA · Aug 2018 – Jun 2022

- Primary developer, with overseas colleagues, on a new global dropship system; built tested Java/Spring Boot services deployed with Docker, Kubernetes, and Jenkins
- Integrated a new transportation management system; resolved production issues with Splunk and Dynatrace

Software Developer — Deacom Inc., Chesterbrook, PA · Jun 2017 – Aug 2018

- Developed C#/.NET applications using LINQ and SQL; turned user needs into enhancements and fixes

Junior Software Developer — Advanced Technology Group, King of Prussia, PA · Jun 2015 – Jun 2017

- Secured an Android app's Google Maps usage; authored AWS IAM policies for client S3 buckets

Certifications & Education

AWS Certified Developer – Associate (Nov 2024)

B.S. Computer Science with Information & Security Assurance Certification — West Chester University, 2016
